Box I Obs rvations where certain claims were found unsearchabl (Continuation of Item 1 of first sheet)
This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:
Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:
Claims Nos.: because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
3. Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).
Box II Observations where unity of invention is lacking (Continuation of item 2 of first sheet)
This International Searching Authority found multiple inventions in this international application, as follows:
see additional sheet
As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4. X No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.: See annex
R mark n Protest The additional search fees were accompanied by the applicant's protest. No protest accompanied the payment of additional search fees.

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. Claims: 6,7,24,25,41,49,57,62,73,78 complete, 1-5,16-23, 34-48,52-56,58-61,63-72,74-77,79-96 partially

Pharmaceutical composition comprising insulin or metformin and a bioavailable source of chromium or vanadium and optionally Mg, aspirin and/or vitamin E. Formulations, methods and kits using said combination.

2. Claims: 10,11,28,29,50,51 complete, 1-5,16-23,34-48,52-56, 58-61,63-72,74-77,79-96 partially

Pharmaceutical composition comprising a thiazolidinedione and a bioavailable source of chromium or vanadium and optionally Mg, aspirin and/or vitamin E. Formulations, methods and kits using said combination.

3. Claims: 8, 9,26,27 complete, 1-5,16-23,34-48,52-56,58-61, 63-72,74-77,79-96 partially

Pharmaceutical composition comprising a sulfonylurea and a bioavailable source of chromium or vanadium and optionally Mg, aspirin and/or vitamin E. Formulations, methods and kits using said combination.

4. Claims: 14,15,32,33 complete, 1-5,16-23,34-48,52-56,58-61, 63-72,74-77,79-96 partially

Pharmaceutical composition comprising a benzoic acid derivative and a bioavailable source of chromium or vanadium and optionally Mg, aspirin and/or vitamin E. Formulations, methods and kits using said combination.

5. Claims: 12,13,30,31 complete, 1-5,16-23,34-48,52-56,58-61, 63-72,74-77,79-96 partially

Pharmaceutical composition comprising an alpha-glucosidase inhibitor and a bioavailable source of chromium or vanadium and optionally Mg, aspirin and/or vitamin E. Formulations, methods and kits using said combination.

Continuation of Box 3.

Claims Nos.: 1-96

Present claims relate to compositions/compounds defined by reference to desirable characteristics or properties, namely "antidiabetic agent" bioavailable source of chromium", "bioavailable source of vanadium" The claims cover all compositions/compounds having these characteristics or properties, whereas the application provides support within the meaning of Article 6 PCT and/or disclosure within the meaning of Article 5 PCT for only a very limited number of such compositions/compounds. In the present case, the claims so lack support, and the application so lacks disclosure, that a meaningful search over the whole of the claimed scope is impossible. Independent of the above reasoning, the claims also lack clarity (Article 6 PCT). An attempt is made to define the compound/composition by reference to a result to be achieved (antidiabetic agent; reduction of initial Hb1Ac levels). Again, this lack of clarity in the present case is such as to render a meaningful search over the whole of the claimed scope impossible. Consequently, the search for the first invention has been carried out for those parts of the claims which appear to be clear, supported and disclosed, namely those parts relating to the compositions/compounds used in the examples and those specifically mentioned in the claims with due regard to the general idea underlying the present application. Example 3 refers to certain tables not present in the application as filed and therefore has not been considered for the purpose of the search.

The applicant's attention is drawn to the fact that claims, or parts of claims, relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure.

Box I	Observations where certain claims wer found unsearchable (Continuation of item 1 of first sheet)
This Inte	ernational Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:
1.	Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:
2.	Claims Nos.: because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
3.	Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).
Box II	Observations where unity of invention is lacking (Continuation of item 2 of first sheet)
This Inte	rnational Searching Authority found multiple inventions in this international application, as follows:
	see additional sheet
1.	As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2.	As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3.	As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4. X	No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.: See annex
Remark	on Protest The additional search fees were accompanied by the applicant's protest. No protest accompanied the payment of additional search fees.

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. Claims: 6,7,24,25,41,49,57,62,73,78 complete, 1-5,16-23, 34-48,52-56,58-61,63-72,74-77,79-96 partially

Pharmaceutical composition comprising insulin or metformin and a bioavailable source of chromium or vanadium and optionally Mg, aspirin and/or vitamin E. Formulations, methods and kits using said combination.

2. Claims: 10,11,28,29,50,51 complete, 1-5,16-23,34-48,52-56, 58-61,63-72,74-77,79-96 partially

Pharmaceutical composition comprising a thiazolidinedione and a bioavailable source of chromium or vanadium and optionally Mg, aspirin and/or vitamin E. Formulations, methods and kits using said combination.

3. Claims: 8, 9,26,27 complete, 1-5,16-23,34-48,52-56,58-61, 63-72,74-77,79-96 partially

Pharmaceutical composition comprising a sulfonylurea and a bioavailable source of chromium or vanadium and optionally Mg, aspirin and/or vitamin E. Formulations, methods and kits using said combination.

4. Claims: 14,15,32,33 complete, 1-5,16-23,34-48,52-56,58-61, 63-72,74-77,79-96 partially

Pharmaceutical composition comprising a benzoic acid derivative and a bioavailable source of chromium or vanadium and optionally Mg, aspirin and/or vitamin E. Formulations, methods and kits using said combination.

5. Claims: 12,13,30,31 complete, 1-5,16-23,34-48,52-56,58-61, 63-72,74-77,79-96 partially

Pharmaceutical composition comprising an alpha-glucosidase inhibitor and a bioavailable source of chromium or vanadium and optionally Mg, aspirin and/or vitamin E. Formulations, methods and kits using said combination.

Continuation of Box 3.

Claims Nos.: 1-96

Present claims relate to compositions/compounds defined by reference to desirable characteristics or properties, namely "antidiabetic agent", bioavailable source of chromium", "bioavailable source of vanadium" The claims cover all compositions/compounds having these characteristics or properties, whereas the application provides support within the meaning of Article 6 PCT and/or disclosure within the meaning of Article 5 PCT for only a very limited number of such compositions/compounds. In the present case, the claims so lack support, and the application so lacks disclosure, that a meaningful search over the whole of the claimed scope is impossible. Independent of the above reasoning, the claims also lack clarity (Article 6 PCT). An attempt is made to define the compound/composition by reference to a result to be achieved (antidiabetic agent; reduction of initial Hb1Ac levels). Again, this lack of clarity in the present case is such as to render a meaningful search over the whole of the claimed scope impossible. Consequently, the search for the first invention has been carried out for those parts of the claims which appear to be clear, supported and disclosed, namely those parts relating to the compositions/compounds used in the examples and those specifically mentioned in the claims with due regard to the general idea underlying the present application. Example 3 refers to certain tables not present in the application as

filed and therefore has not been considered for the purpose of the search.

The applicant's attention is drawn to the fact that claims, or parts of claims, relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure.

A. CLASSIFICATION OF SUBJECT MATTER IPC 7 A61K31/555 A61K33/24

C. DOCUMENTS CONSIDERED TO BE RELEVANT

A61K31/64

A61K31/155

A61K31/425

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC 7 A61K

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EMBASE, CHEM ABS Data, MEDLINE, BIOSIS, EPO-Internal, WPI Data, PAJ
